

## **United Way of Monroe County – Heading Home Communications Intern**

United Way of Monroe County and the Community Foundation of Bloomington and Monroe County are excited to set up and lead a collaboration to reduce homelessness and the housing insecurity issues we face as a community. With support from Bloomington Township, the City of Bloomington, Monroe County Government, Perry Township, and the South Central Indiana Housing Network, efforts are underway to bring together the community to develop a path forward.

This work will not be fast or easy. The issues around homelessness are complex at both the individual and systemic levels. Homelessness knows no geographic boundaries, and with many regional resources concentrated in Bloomington, a multi-county approach is needed.

Building on new and existing partnerships, many formed during the COVID-19 pandemic, we plan to bring together a wide-reaching network of regional providers, funders, and others to support short- and long-term strategies to reduce homelessness and address housing issues.

An intern is sought to assist with developing and executing communication strategies including website/blog updates, social media, press releases, and more. The intern would work closely with the Director and Assistant Director of Housing Security, and be provided with office space and a supportive, collaborative environment to grow in.
